Smart Healthcare & AI Pharmacovigilance

Polypharmacy Risks Cause Millions of Preventable Adverse Events

30%

Preventable Hospital Admissions

Of all acute hospital admissions in older adults stem directly from adverse drug-drug interactions.

\$30+ Billion

Annual Financial Burden

Spent on treating medication-related adverse events annually.

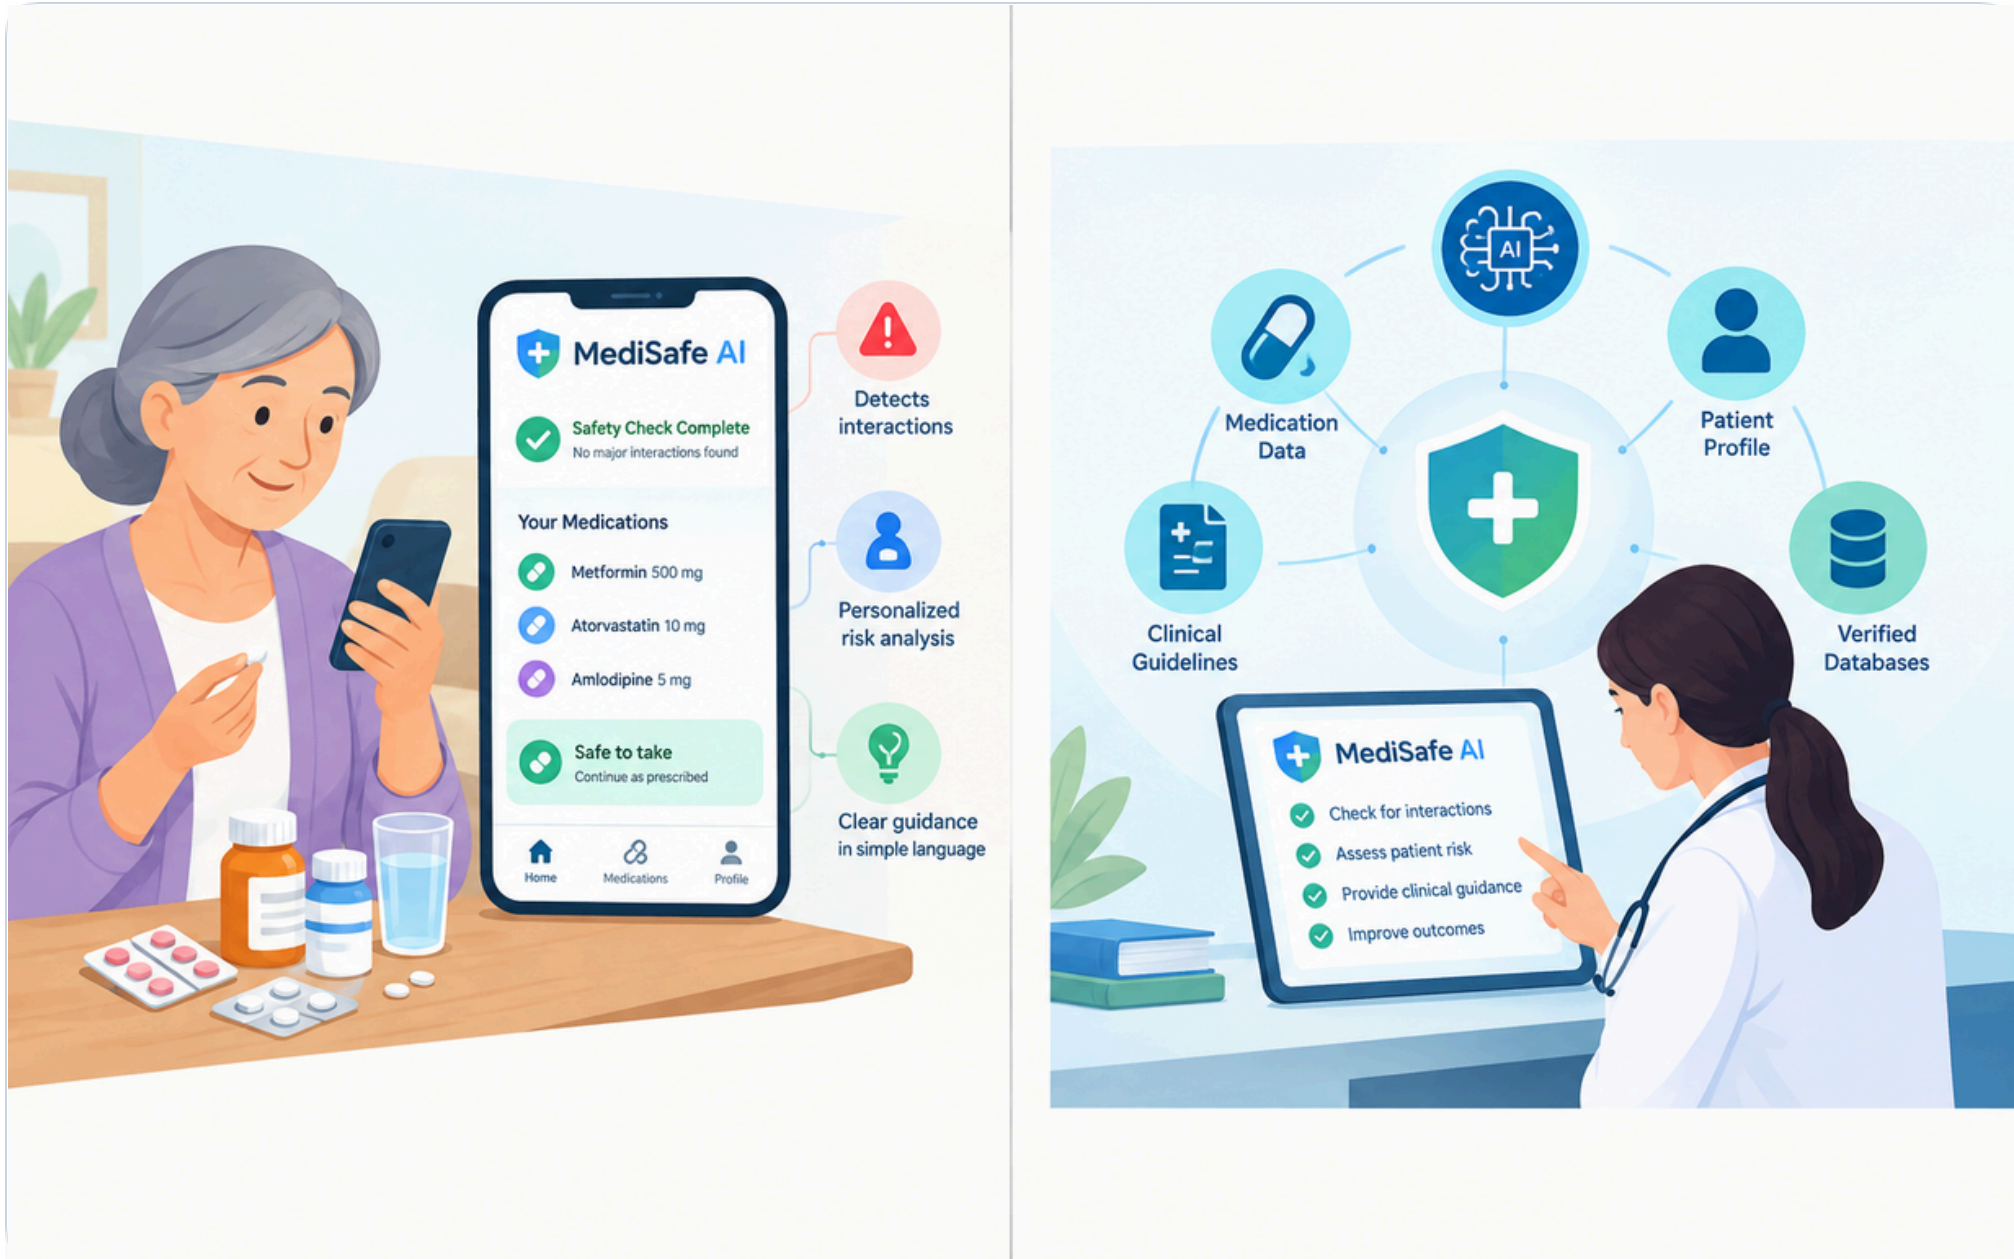

70%+ Preventable

Dose & Combination Errors

Adverse reactions tied to predictable pharmacodynamic overlap.

OUR SOLUTION

MediSafe AI: Real-Time Medicine Safety Verification

✔ Instant Safety Audits
Analyzes multi-medicine inputs instantly to flag contraindications before intake.

🗣️ Intelligent NLP Engine
Translates complex pharmaceutical datasets into plain language patient guidance.

📱 Accessible Everywhere
Designed for patients, caregivers, and telehealth consultation workflows.

Three Pillars of Patient Safety Intelligence

Interaction Matrix

Instant detection of high-risk drug-drug interactions.

Patient Profiling

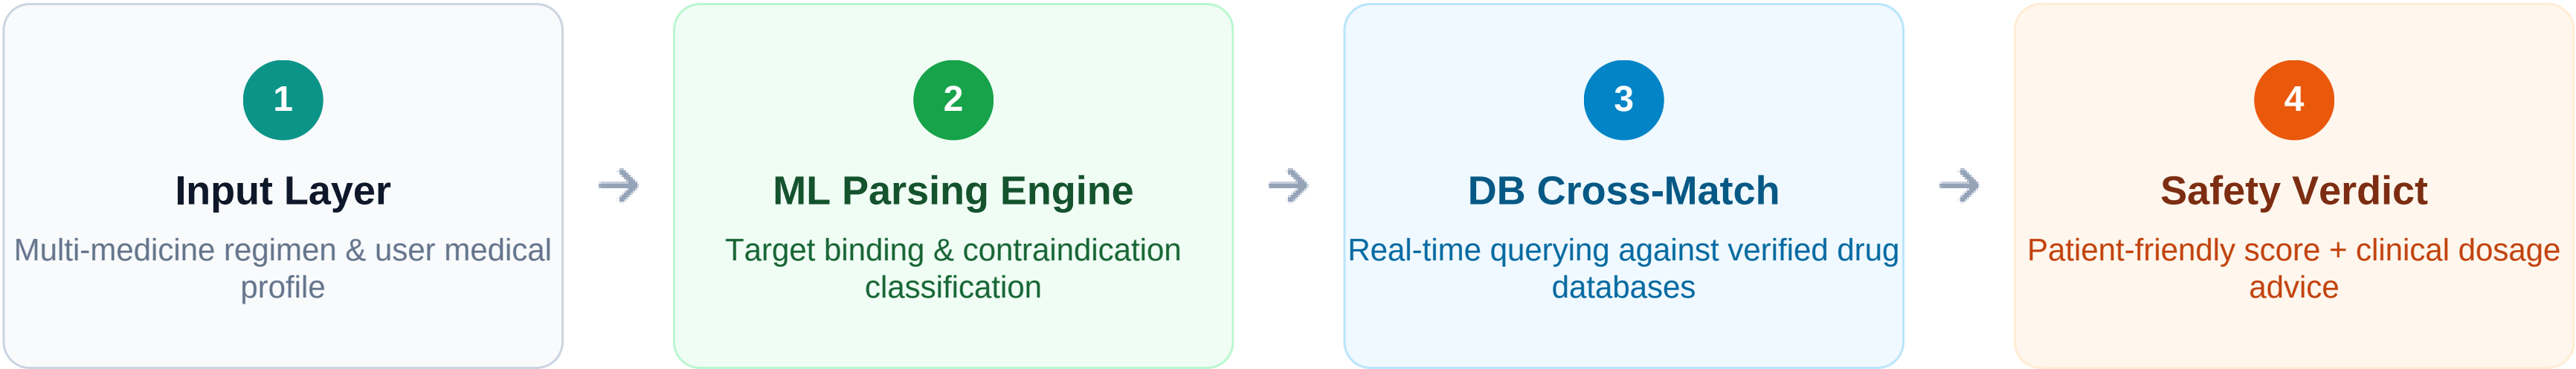

Custom risk scores tailored to specific health profiles.

Clinical Risk Alerts

Clear, actionable alerts without overwhelming alert fatigue.

End-to-End Pharmacovigilance Intelligence Flow

Empowering Key Healthcare Ecosystem Stakeholders

PATIENTS & CAREGIVERS

Home Safety Audits

Instant clarity for elderly users managing polypharmacy regimens.

TELEHEALTH & E-PHARMACY

Checkout API Plugins

Automated cart checks prior to prescription dispatch.

CLINICIANS & HOSPITALS

Decision Support

Reduces prescription errors during acute care admission.

PERFORMANCE METRICS

Engineered for Accuracy & Sub-Second Response

0.94

ROC AUC Accuracy

High predictive precision across system organ classes.

<100ms

Inference Latency

Real-time query execution for instant UI updates.

25k+

MedDRA Preferred Terms

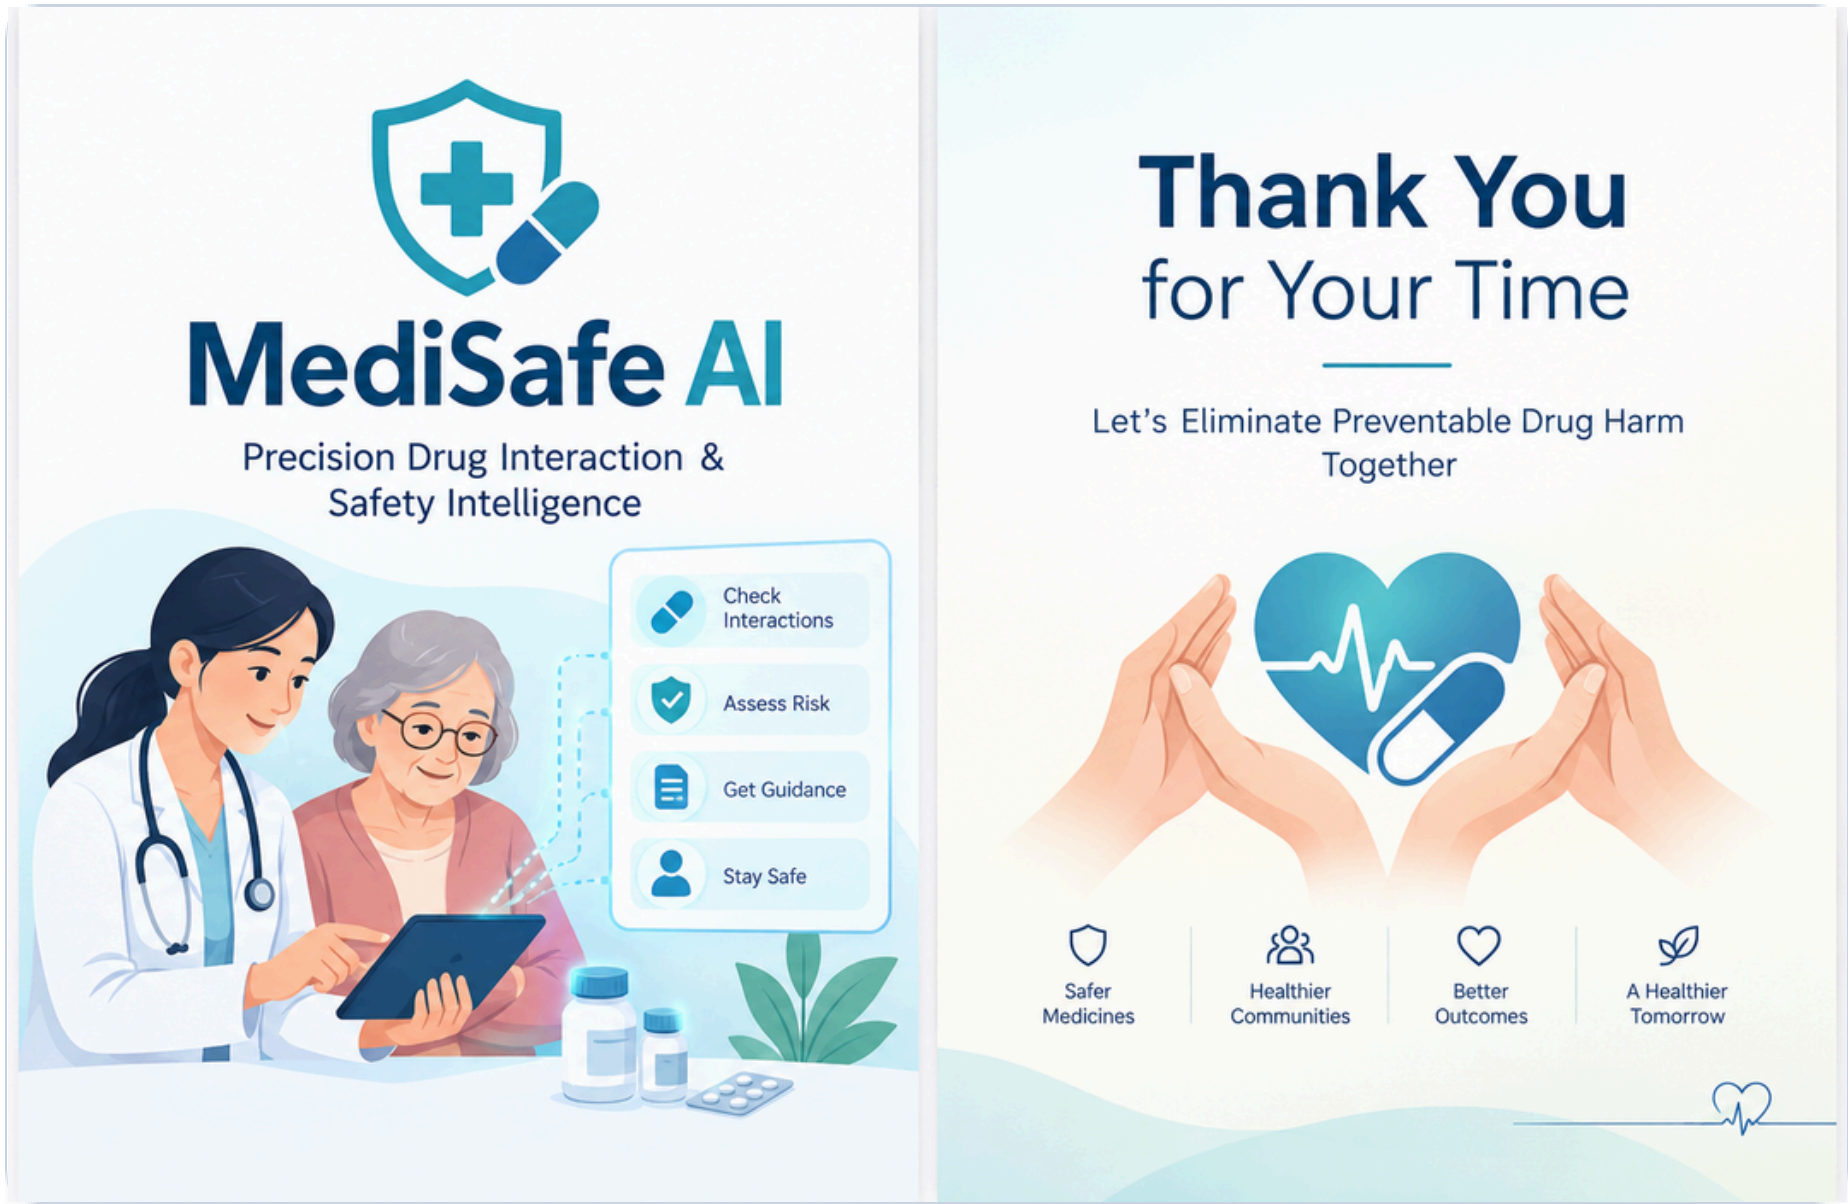

Comprehensive pharmacological classification mapping.

100%

Deterministic Rules

Zero hallucination safety gate for known drug pairs.

Backed by Scientific & Analytical Excellence

MediSafe AI Product Expansion Roadmap

Q4 2026

EHR Integration

FHIR API connectivity for seamless hospital system embedding.

Q1 2027

Voice & Vision AI

OCR pill bottle label scanner and natural voice assistance.

Q2 2027

Local Languages

Multi-lingual regional translation for inclusive healthcare.

Q3 2027

Pharmacy API

B2B SDK rollout for online drug dispensaries.

THANK YOU FOR YOUR TIME

Let's Eliminate Preventable Drug Harm Together

MediSafe AI is ready for demonstration and evaluation. We welcome your feedback and questions!
